DETAILED ACTION

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

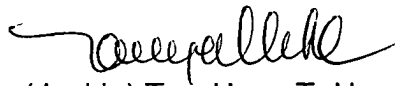

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over CH 621 476 A5 reference which disclose a tip for eye surgery comprising a coating for preventing the corrosion, wherein the coating comprising Chromium, and the coating can be obtained by any known method. Although, the coating is not tungsten carbide, tungsten carbide is a known material for using in coating for preventing corrosion. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the coating material of CH621 476 A5 reference with tungsten carbide for preventing the corrosion of the tip . Doing would amount to mere substitution of one known material for another within the same art that would perform equally well for protecting the tip of CH 621 476 A5 reference from corrosion.
